AI LEGAL CONSULTING

Kilpatrick Connect

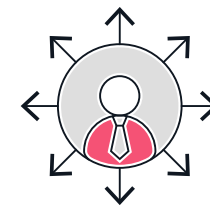

All companies are now AI companies

Kilpatrick Connect is a legally focused Artificial Intelligence (AI) consulting and advisory offering built upon Kilpatrick's AI, legal, and industry expertise and delivered through a *confidential attorney-client relationship*.

For nearly 165 years, Kilpatrick has been a trusted partner to the world's innovators. We understand the transformative potential of AI and its profound impact on your business and provide a safe, secure, and economical hub for your questions, issue resolution, and strategy development concerning AI.

All companies are now AI companies. Our consulting services are tailored to navigate the intricate legal, regulatory, and policy landscape surrounding AI, supporting the development of practical and actionable AI strategies and solutions while ensuring your business remains compliant, mitigates risks, and is positioned for growth.

Full-Service Model

We work with you to learn your AI goals and concerns and perform an AI Readiness Assessment to (1) develop an initial overall legal strategy and (2) identify legally significant areas-of-interest regarding AI. After the assessment is completed, you select the areas-of-interest for us to address, and we organize firm-wide teams to meet your objectives.

During this process and after the areas-of-interest have been addressed, we facilitate ongoing communications, education, and monitoring with you concerning your AI objectives and developments in AI while also identifying new areas-of-interest as they arise.

Complementary Model

You retain Kilpatrick Connect to provide AI legal consulting and practice-specific services in parallel with other "traditional" consulting entities you have retained (we provide these services to you directly rather than partner with your other consulting entities to preserve the unique nature of the attorney-client relationship).

AI's development and impact is uniquely fraught with complex legal challenges, necessitating consistent access to experienced legal advice and oversight regarding all your interactions concerning AI.

Today's AI Landscape

The AI landscape is evolving rapidly, as both businesses and governments grapple with how to approach this all-encompassing nascent technology and its implications. Kilpatrick Connect helps you navigate the complex landscape of AI legal implications, rules, and regulations and enables you to fully leverage the technology's potential for your business.

\$1 Trillion

In capex earmarked for AI development, infrastructure, and implementation.

Rapid Adoption

AI technology has been adopted faster than any recorded technological advance and is still in its early stages.

Ubiquitous Implementation

Much like the internet's swift and broad impact, ubiquitous AI implementation is anticipated to be achieved on a 5- to 10-year timeline and will remain a lasting priority for all companies.

Complex Policy and Regulation

AI will be governed by a complex and rapidly developing patchwork of global (EU AI Act, Chinese AI Provisions, etc.), federal (Executive Order on AI; agency rules from USPTO, NTIA, SEC, OMB, HHS, DOE, and others), and state policies and regulations (such as Colorado, Tennessee, and Utah AI laws).

Broad, Lasting Impacts

AI's impact expands beyond tech, affecting every sector, including those not traditionally considered "tech," such as healthcare, telecommunications, transportation, insurance, education, manufacturing, finance, energy, employment, and more.

Why Kilpatrick Connect?

Trust and Expertise

With nearly 165 years of expertise and client success, Kilpatrick is your dedicated partner for identifying and addressing the myriad legal intricacies and impacts of AI.

Comprehensive Approach

Our services, supported by Kilpatrick's 650+ attorneys and lobbyists, cover every aspect of AI from intellectual property and employment to regulation and risk management, ensuring a legally holistic and actionable approach to your comprehensive AI strategy.

Secure and Confidential

As a multinational law firm representing 1/3 of the Fortune 50, Kilpatrick maintains the highest standards of security, and our AI consulting services are conducted within a confidential attorney-client relationship.

Dedicated to You

Success at Kilpatrick rests on our strong and enduring connections with our clients and colleagues. We understand your businesses and partner closely with you to achieve your AI goals, without trying to sell you on something else.

Solutions for Today and the Future

Despite its omnipresence and advancements, AI remains in its infancy, necessitating approaches that not only address its current capabilities and effects, but also prepare for inevitable evolutions, novel use cases, and expanding impacts.

Connect with Us

Ready to take the next step in your AI journey? Contact Kilpatrick Connect today to learn how we can help you navigate the legal complexities of AI and position your business for success.
