AI Prompt-Injection Hacking Creates Emerging Legal Risks

Law360

September 3, 2026

Prompt injection is creating a new set of legal and cybersecurity risks as AI becomes more embedded in everyday business and legal workflows.

From hidden instructions that can manipulate AI-generated summaries to potential trade secret, employment, litigation, and patent implications, partners **Joel Bush** and **Charles Gray** examine the emerging risks in a new *Law360* article, offering practical steps organizations can take to reduce exposure.

To read more about what you should be watching as this area continues to evolve click "Download PDF" or access the article on *Law360*.
