Kilpatrick Connect

Your Trusted AI Partner

Artificial intelligence (“AI”) is an essential and growing component of every business. AI can unlock new revenue streams, optimize operations, enhance decision-making through data-driven insights, personalize customer experiences, and drive innovation. But it also presents challenges, including regulatory non-compliance, data biases, cybersecurity vulnerabilities, high implementation costs, ethical challenges in usage, and reputational damage if AI-driven outcomes harm customers, employees, or stakeholders.

Kilpatrick Connect is a legally focused consulting and advisory offering designed to help you address and leverage all aspects of AI. Our offerings are customized to guide you through the complex legal, regulatory, and policy environment related to AI. We support the creation of practical and actionable strategies and solutions, ensuring your business stays compliant, mitigates risks, and is positioned for growth. Kilpatrick Connect is built upon Kilpatrick’s AI, legal, and industry expertise and delivered through a *confidential attorney-client relationship*.

Kilpatrick Connect can support all aspects of your AI initiatives, offering comprehensive legal guidance, crisis management, and issue-specific counsel, as well as complementary services in parallel with traditional consulting firms.
