Industries

Health & Life Sciences

Matthew Hinsch concentrates his practice on patent prosecution, primarily within the field of biotechnology. He has advised clients in multiple technical areas, such as genetic modification including CRISPR, immunology and immunotherapy, plant biology, stem cells, disease therapeutics, and molecular biology.

In his practice, Matthew represents a wide variety of clients, including academic institutions, startup biotechnology and drug discovery companies, and large pharmaceutical companies. He assists clients with patent prosecution, freedom to operate analyses, validity/infringement opinions, IPRs, due diligence reviews, and patent portfolio management.

Research for his Ph.D. involved plant molecular biology and the study of the molecular basis of disease resistance in plants.

Matthew was recommended by *Legal 500 US* in 2019 and 2021 for Patent Prosecution.

Education

University of California, Boalt Hall School of Law J.D. (1999)
