

Managed Network Services Transactions

Optimizing Your Network

The demand for complex network services management, greater network accessibility, and improved business processes is on the rise. At Kilpatrick, our attorneys bring significant experience working with clients in a variety of telecommunications and managed network services transactions, including global transactions involving managed network services, local area network services, wide area network services, wireless network services, transport services, EVPN, Anira, On Net, Off Net, and POTS.

Experience
