Data Privacy Day

January 22, 2024

Data Privacy Day is celebrated annually on January 28th to promote awareness about the importance of respecting privacy, safeguarding data, and fostering trust. Kilpatrick's Cybersecurity, Privacy & Data Governance Team has created an assortment of materials that you can use to mark the day at your organization. Please reach out if we can help with any of these efforts or you are interested in a customized presentation or tabletop exercise.
