Written by **Brian G. Corgan** and **Daniel K. Johnson**

All areas of construction litigation are covered in this two-volume set, starting with case analysis, pretrial activities, and special forum issues. The authors continue with an in-depth discussion of the difficult presentation issues for delay and acceleration claims, lost productivity claims, and establishing damages. The final section of the text covers trial and other issues, including direct and cross-examination, appeals, and settlement and releases. Practical examples of, and checklists for, the drafting of many of the key documents used in construction litigation are also included.
