Kilpatrick Townsend's LitSmart® E-Discovery Team Once Again Named as a Finalist for the Relativity Innovation Award for Best Law Firm Solution

October 25, 2017

Kilpatrick Townsend & Stockton announced today that the firm's **LitSmart® E-Discovery Team** has been named a finalist for the **Relativity Innovation Award for Best Law Firm Solution**, for the third year in a row.

Kilpatrick Townsend's LitSmart® E-Discovery Team achieved this distinction for their development of the LitSmart® Exhibit Sticker to reduce last-minute scrambles to manually apply exhibit stickers. Fully integrated with Relativity, the application enables users to add exhibit stickers—tailored to the case and court—with the click of a button. This not only reduces time and money spent, but also reduces the risk of error.

"We are excited to once again be recognized among the nation's e-discovery elite as a finalist for the Relativity Innovation Award for Best Law Firm Solution," said **Craig Cannon**, LitSmart® E-Discovery Team Leader. "This is a prestigious and coveted honor, and a true testament to Kilpatrick Townsend's commitment to client service and innovation."

Relativity recognized finalists and announced winners during a special ceremony at Relativity Fest, the annual e-discovery conference held October 22-25 in Chicago. This year, Relativity Fest brought nearly 2,000 attendees from around the world together for a three-day event featuring engaging panel discussions, hands-on labs, breakout sessions, and insights from both Relativity team members and end users. Kevin Duncan, a Senior Project Manager on the LitSmart® E-Discovery Team, presented the LitSmart® Exhibit Sticker to all Relativity Fest attendees during the final day of events.

The Relativity Innovation Awards is an annual competition celebrating organizations that use Relativity in creative ways, solving difficult or unique challenges within and outside of e-discovery. Judges selected solutions that use various application integration points to display an extensive use of Relativity's APIs to streamline processes, solve complex workflow needs, and create an altogether new solution that positively impacts business strategy.
