The State of Democracy Education in Law Schools

American Bar Association Task Force for American Democracy

May 6, 2024

Written by **Sydney A. Grell**

Democracy plays an indispensable role within the context of law school education by emphasizing its multifaceted influence on fostering critical legal thinking, shaping ethical values, and preparing students for active participation in the legal system. By nurturing an environment of open dialogue, inclusivity, and respect for diverse perspectives, law schools can cultivate the next generation of legal minds who are not only well-versed in the law but also adept at advocating for the principles that underpin a just and democratic society.
