What's Needed to Solve the Global Climate Crisis?

Innovation News Network

AUGUST 7, 2023

The first expert to whom I turned is a senior executive at a top five US bank. The second expert is **Mark J Riedy**, a partner of the Kilpatrick, Townsend & Stockton (KTS) law firm, who co-founded and leads the KTS project finance and energy team of over 80 attorneys. Riedy's focus during his over 45-year career has been on US and international project development, and finance and private placement representation of renewable and conventional energy, clean technology, environmental, and infrastructure clients. He has been deeply involved in all government grant and loan guarantee programmes that contribute to advancing projects that can address the global climate crisis.
