Roxana Malladi is a registered patent agent who assists clients in drafting and prosecuting patent applications including application preparation and office action prosecution in technologies involving artificial intelligence, large language models, cybersecurity, machine learning, systems application programming, and digital applications in oil and gas.

Prior to joining the firm, Roxana was a patent agent at an AmLaw 200 full-service law firm where she prepared patent applications, USPTO filings, and other foreign filings. Roxana worked for more than ten years in product development and software engineering in technological fields that included search engine, content, telecommunications, and business intelligence. Following her work as a software engineer and analyst, Roxana became an IP professional in the global research division of a multinational conglomerate where she gained specific experience with machine learning and cloud platforms, digital twins, industrial systems, and wireless sensor networks, particularly in healthcare.
